

THERE'S MORE TO IT THAN BOXES

The real cost of a complex IT strategy is largely made up by the intangible costs. Software licences, infrastructure, consultant costs, training and support are often overlooked by leasing companies causing a burden on cash-flow. At CSG we're different.

CSG can fund the whole solution

At CSG we pride ourselves in being one of the few companies able to supply a funding solution for the entire scope of an IT project. Our leasing can cover the initial and ongoing consultancy charges, the software licenses, the networking, be that an upgrade or brand-new install, the training and of course the hardware itself.

But we can do so much more. Our Technology Refresh product can give IT decision makers the ability to plan for the long term and if necessary react, all without incurring spiralling costs across all of their hardware components. Businesses choose our Technology Refresh option to be safe in the knowledge that they will be able to upgrade technology in future, in line with their strategy, or should something unforeseen occur, without increasing regular repayments.

We work around you

Many suppliers of funding expect their clients to jump through hoops before any monies are released. We believe that this is the wrong way to do business. We work with you to provide the right solution for you, a bespoke solution, not just an off-the-shelf product, and we have streamlined our paperwork to make your life easier at every stage. We have even created Capital Manager, an online tool that enables you to track your lease throughout its lifetime and even monitor the hardware itself.

Life Cycle Management

CSG will partner you through the complete lifecycle of your solutions. Our products allow you to choose and implement the solution with confidence, manage the assets and schedules throughout their life and manage asset disposal when the term is finished.

*Technology Refresh is subject to underwriting and standard terms.
